

GIVT: Gas Inlet Valve

The GIVT allows efficient and controlled transfer of high-pressure gas through hoses from the gas cylinder into the structure. A wide range of jet sizes and fittings are available to suit many applications.

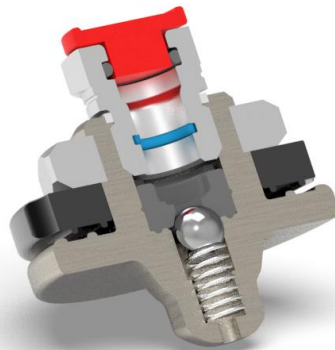

GIVT Key attributes and benefits:

- Compact Design.
- Rugged and Reliable construction.
- Range of jet sizes to suit inflation speed or size of structure.
- Swivel joint to allow movement of the hose during inflation.
- Designed to minimise ice formation in the system when used with the GIST Cylinder Valve.

Certificate of type approval:
SAS S150044/M4

- Incorporates a non-return valve to prevent loss of pressure after inflation.
- Snap fit hose connections for fast assembly without tools.
- Simple alignment of the jets from outside of the structure.
- Body available in a Nickel plated or un-plated Brass versions. Connector nut is available in either Plated Steel or Stainless Steel.
