

# Non Return Valve Snap Fit Connector

NRV Snap Fit Connector allows unidirectional airflow between chambers at a range of preset pressures. Ideal for internally connecting chambers to transfer gas, once a predetermined pressure in the first chamber has been reached. The non-return function prevents the transferred air being returned to the first chamber in the case of a leak.

- A Range of pressures available from 0.5psi to 4psi.
- No routine servicing or maintenance.
- Operational Temperatures: -30°C to +65 °C.
- Clamps into a wide range of fabrics.
