

D7 Dropstitch Inflation/ Deflation Valve

Registered Design

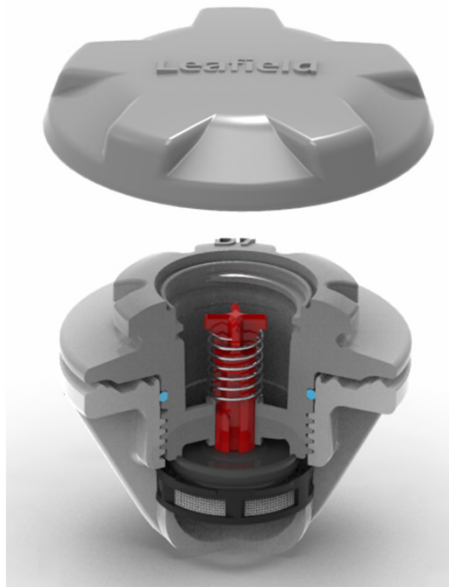

The D7 Dropstitch valve is specifically designed for use with high pressure drop stitch fabric. It is ideal for use in paddle boards, rescue platforms and water park equipment. It is also used in demanding Commercial and Military applications such as boats and combat craft.

- Rugged and reliable.
- ACETAL plastic parts give high strength with chemical, ozone and shock resistance.
- The cap works as a second seal.
- Company logo can be placed on the cap, subject to a minimum quantity and tooling charge.

D7 for Drop stitch fabric - Key features:

- Internal mesh filter stops drop stitch threads and debris entering the valve seal and causing leaks.
- Suitable up to 30psi.
- Smooth low profile – 50mm overall height.
- 'O' ring seal on the valve core reduces the risk of lateral leaks in the fabric.
